## UNEP “Global Environment Photograph Exhibition” ~Pictures Changed for the Sixth Time~

“Global Environment Photograph Exhibition” organized by UNEP\* is held throughout the year at the North Concourse of Tokyo Big Sight. Please come and see the pictures that were renewed on March 23<sup>rd</sup>, 2009.

There are such pictures as “Future of the Forest” that addresses the problem of deforestation and “The near-defunct ‘Refrigerator’” which shows the peat burnt in the forest fire during the summer continuing to smolder under the winter snow in Siberia.

These pictures appeal strongly that we take the issue of global warming seriously and the necessity to deal with it.
