

Radiation and radioactivity around the Tokyo Big Sight
Measurement results posted by Tokyo Metropolitan Government

As a countermeasure to dispel harmful rumors in connection with the accident at the Fukushima No. 1 Nuclear Power Plant, Tokyo Metropolitan Government has decided to monitor the radiation in the atmosphere at each container wharf of Tokyo Port and radioactivity in seawater at Tokyo Port for the time being from April 14, 2011.

On the following web site of the Tokyo Metropolitan Government, measurement results around the Tokyo Big Sight (International Exhibition Center) are being posted. We provide this information for your reference.

- Measurement results of radiation and radioactivity in Tokyo Port
