Tokyo Big Sight Inc.

Fiscal Year 2008

Utilization Report of Tokyo Big Sight

331 exhibitions and 1,208 conferences were held in the fiscal year of 2008. The exhibitions and meetings were successful and Tokyo Big Sight was privileged to welcome over 12 million visitors. As you can see from the graph below, we have welcomed 10 million visitors annually since 2004.

Even though the number of exhibitions held has declined, the utilization rate was stayed the same as last year and ended to be 75.9%. This means that large-scale exhibition was held.

This year, many industries are affected by the worldwide economic depression, and are experiencing sharp downturn in demand of products and services. Tokyo Big Sight will contribute to economic recovery and industrial development through exhibition business, which creates new demands and business chances.
