

Announcing JIMTOF 2022: The 31st Japan International Machine Tool Fair

Dates: November 8 (Tue.)–November 13 (Sun.), 2022

Venue: Tokyo Big Sight (East Halls/West Halls/South Halls)

The Japan Machine Tool Builders' Association (Chairman: Yoshiharu Inaba) and Tokyo Big Sight Inc. (President & CEO: Kiyotsugu Ishihara) will hold JIMTOF 2022: The 31st Japan International Machine Tool Fair at Tokyo Big Sight over six days from November 8 (Mon.) to 13 (Sun.), 2022.

JIMTOF, one of the world's largest international technology shows, brings together cutting-edge technologies and products. The trade fair is a comprehensive showcase of items from across the manufacturing spectrum, from machine tools and peripherals of all kinds.

This time, JIMTOF marks its sixtieth anniversary, and this time's fair will be the biggest ever. We're expanding our venue, using the South Halls of Tokyo Big Sight for the first time in addition to the East and West Halls, and the total exhibition area will cover 118,540 square meters.

■ Exhibitor application schedule

Application Period (Japan Standard Time):

[Members of the organizers, cooperating organizations and overseas industry associations]

9:00 a.m. on October 1 (Fri.)–11:59 p.m. on October 31 (Sun.), 2021

[Non-members in Japan/overseas]

9:00 a.m. on November 1 (Mon.)–11:59 p.m. on November 30 (Tue.), 2021

Application method:

All applications should be made via the official JIMTOF website. Exhibitors should apply by completing the Exhibitor Application Form, which is available on the official website.

■ Main features of JIMTOF 2022

(1) A compelling collection of the latest cutting-edge technologies and products: Enhancing JIMTOF's pull as an international technology show

JIMTOF has long been a platform for product debuts, with more than half of all the exhibitors at every gathering using the opportunity to roll out their latest creations. For many exhibitors, JIMTOF represents a major target on the development timeline. Considering its high profile in the industry, JIMTOF has won acclaim for giving visitors their first looks at new products and technologies. The JIMTOF Fair Management Office will continue to provide event-goers with as much information as possible on new products and technologies.

(2) Enhance digital PR tools to build anticipation before the physical exhibition

While the physical exhibition remains our main focus, JIMTOF 2022 will augment its online presence to support the visitor experience. We will use digital PR tools to build anticipation in the lead-up to the event, and the experience of the fair itself will be made smoother than ever by enhanced online catalogue functions and the expanded information delivery services we will offer from the official website.

Making exhibition information available to visitors in advance will make it easier for exhibitors to attract potential customers and business opportunities to their booths.

(3) Co-sponsored projects to meet the needs of the times: Hosting a variety of captivating co-sponsored events and feature exhibits

JIMTOF 2022 offers much more than just the booths of new products and technology. As organizer, we will also put on a wide variety of concurrent events to enhance the pull of the fair as an international technology show. These will include a range of lectures and seminars, special exhibits that allow visitors to get a hands-on experience of the latest trends in technology, and events for students, who will be responsible for the future of the manufacturing industry. The South Halls area that will be added to the venue for the first time this year will host the special event "Additive Manufacturing Area in JIMTOF 2022." This area will bring together a wide range of AM products and technologies from one of the hottest trends in technology today and a field that is expected to see major growth in the years to come. This special event will boost the profile of the AM sector and help exhibitors to create new business opportunities by communicating their message to a wider range of visitors.

Catchphrase: Open the door to the future—Meet the technologies moving the world forward

Concept: JIMTOF resembles a "door" to the future. It is a place where you can meet technology that moves the world. Inside the door, it expresses the state cutting-edge technology and people meeting. A golden band of light represents the various technologies gathering at JIMTOF and being transmitted to the world through that meetings. In the catchphrase Open the door to the future—Meet the technologies moving the world forward, we hope that many wonderful encounters will be made possible at JIMTOF, which will be

held for the first time in four years. We are gearing up so that this will prove to be leap forward for the industry.
